You can decide how much of the graph is prefilled, the color of the edge, the heel counting step and so on. Graphics can be made in HTML or PDF format (both are easy to print). Another feature is that you can highlight in yellow the boxes at certain intervals, which creates beautiful heel counting patterns. Tip: Use a negative step to practice the back count back. Below you will find some common graphics in HTML and PDF format. With the exception of the two best (which are static), they are randomly generated each time you click the button. The answer key is automatically included on the second page. To get a different chart using the same options, press 'Update' in the browser window (html only). Roll the page to the generator if you want to customize the graphics. Interactive 100-Chart This interactive tool allows children to explore a 100-year-old teacher or a teacher to illustrate various concepts of mathematics, such as pair and odd numbers, multiples of 5 and 10, and the jump count for 2, 3, 4, 5, and so on. Number chart worksheets generator with generator, you can make custom numbers charts and lists. You can also allow students to use the generator to practice heel counting concepts. Ask them, for example, to make a numerical graph of odd numbers, a chart for a specific heel count pattern or a graph in which multiples of 4 are colored yellows. If the chart flows over page width, you will need to reduce font size, have fewer numbers in each line or print on landscapeHTML. format). format).
